```
《節例2》不同元素設定不同背景顏色
<head>
          <title>background-image</title>
          <style>
                     body {background-image: url("bg3.jpg");}
                     #div1{ height: 220px; background-image: url("bg6.jpg");}
                     #div2{ height:220px; background-image:url("bg4.jpg"); background-repeat:repeat-x;}
                     #div3{ height: 220px; background-image: url("scenery04.jpg");
                                background-repeat: no-repeat; background-position: right top;}
                     #div4{height: 220px; background: #fff888 url("bg7.jpg") repeat-y left bottom;}
          </style>
</head>
<body>
          <div id="div1">Hello</div>
          <div id="div2">World</div>
          <div id="div3">Department of Information Management</div>
          <div id="div4">Chang Jung Christian University</div>
</body>
```

BACKGROUND-IMAGE(CSS3)

```
《範例3》css3允許同時設定多張背景圖
<head>
        <title>Multiple Background Images</title>
        <meta charset="UTF-8">
        <style>
                 #div1{
                         height: 400px; width: 400px;
                          background-image: url("scenery04.jpg"), url("bg4.jpg");
                          background-position: right bottom, left top;
                          background-size: 330px, auto;
                          background-repeat: no-repeat, repeat;
        </style>
</head>
<body>
        <div id="div1"><h1>資訊管理學系</h1></div>
</body>
```

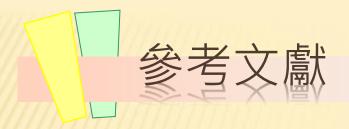

BACKGROUND-IMAGE(CSS3)

★ 《範例4》css3可將背景圖放大至整個區域

```
<head>
         <title>Scale Background Image</title>
         <meta charset="UTF-8">
         <style>
                  #div1{ height: 300px; width: 300px;
                           background-image: url("images/bg7.jpg");
                           background-size: cover;
         </style>
</head>
<body>
         <div id="div1"></div>
</body>
```
